Why does it take 30 days to delete a Facebook account? Facebook has a 30-day grace period before deleting any account. This is to allow the user to change their mind and keep their information on Facebook. It's been a while since you replaced your old (and heavily populated) profile Facebook with a new one, proposing to accept only friend requests from people you really know, so that you can peacefully post thoughts, links, and images, without fear that some stranger might somehow annoy you. After you finally realized that you no longer need the old profile, you decided to get rid of it permanently ... but, in practice, a little problem arose: you no longer remember the email or password to access it, for what you are thinking of giving up and leaving it there, in the background, waiting for Facebook take your course. Don't throw in the towel yet, all is not lost! In fact, following the advice that I am going to give you in this guide, it is possible that you can delete a Facebook account without password and email in a few minutes. Don't worry, you don't have to do complicated operations or act through program Harmful "recovery" options: you just need a computer, smartphone or tablet, a little patience, and a little bit of luck - in these cases, it never hurts. So, without further ado, sit back and read at once the passages that I am going to explain to you in this guide: there are excellent chances that, at the end of reading, you can reach the goal you have set for yourself without anyone. effort. Happy reading and good luck! How to delete a Facebook account without password from mobile phones and tablets Regain access to the account Delete Facebook profile How to delete Facebook account without password and email from PC Regain access to the account Delete Facebook profile How to delete a Facebook account without password from mobile phones and tablets If that is your intention delete a Facebook account without password and email acting through mobile phone or tablet, follow without fail the instructions that I am about to give you in the following sections: first, I will teach you how to get access to Facebook again, and then I will show you how to proceed with the permanent deletion of the account. I assure you it is not difficult. Regain access to the account To regain access to your Facebook profile without remembering the email or password associated with it, you can use the phone number (which you should have previously associated with the account through an automatic procedure). So first of all download and install the Facebook app on Android o iOS, launch it and touch the item Did you forget your password that appears on the welcome screen. Once done, point to yours First nameyours e-mail or yours phone number in the field Search your profile, select (if necessary) the account you want to delete and press thebutton. Follow attached to the screen Confirm your account. After a few moments, if everything went well, you should receive an SMS with a Verification code : indicate it in the field Enter the code from the Facebook app, tap the button Follow, place the check mark next to the item Disconnect from other devices To disconnect all devices connected with the above password, touch the button Follow and, to complete and log back into the account, Enter a new password in the corresponding field and touch the button again Follow. If you have in no way been able to access the password reset after entering the phone number, it means that the phone number has never been linked to the account you want to get rid of - you can try to solve this problem using a Pc and the functionality Trusted Contacts Facebook, as I will explain in the next bars of this guide. Delete Facebook profile After regaining access to the Facebook account, you can proceed with the permanent deletion of it: once you have logged in through the social network application, tap the button ☰ and select items Settings and privacy es configurations. At this point, tap on the options Account ownership and controls- Deactivation and deletion, place the check mark next to the item Delete account, Press the button Continue deleting the account and, if you want to download a Backup of the profile data in advance, click the button Download the information and follow the instructions on the screen. Finally, to start the removal process, tap the button Delete account, indicates the password profile in the corresponding box at the top, tap the button Follow and confirm the willingness to proceed by pressing the button for the last time Delete account. Remember that you have 30 days It's time to retrace your steps and cancel the profile deletion: in this case, all you need to do is log in again with the credentials associated with your profile and confirm your reactivation. How to delete Facebook account without password and email from PC Are you a regular Facebook user from a computer and, through the latter, would you like to delete the account that you can no longer access? Then this is the section for you. In fact, below I will show you how to regain access to your profile, and then I will explain in detail how to get rid of it permanently. Regain access to the account Before you can permanently delete the Facebook account of your interest, you must first gain access to it again. If you are no longer able to reset your Facebook password because you no longer remember the password associated with the email address you signed in with, I suggest you check out my guide on how to recover your email password and, once you have regained access to the email box, reset the password of the profile that will be deleted by following the instructions I gave you in my dedicated tutorial. How do you say? Can't remember which mailbox you used to create the Facebook account you want to delete? Then I suggest you take a look at my guide on how to retrieve facebook email: you could find the solution to your problem in no time. Finally, if you can no longer access the mailbox in question because it has been deactivated or, worse, has been hacked, you can try to access your profile again using the phone number associated with the account to be deleted, or identification through Trusted Contacts. Now I will explain how. Phone number To regain access to Facebook using the phone number, proceed as follows: connect to the main page of the social network and click on the link You no longer remember how to log into your account, immediately below the field Password. On the next screen, enter your phone number in the field Email or phone and press the button Search to find your profile. If you don't remember exactly which of the numbers in your possession you have matched that profile, you can write yours in the same field name and surname, then click on the button Search and, once the account to be deleted has been identified in the proposed list, press the button It is my account. At this point, the game is practically over - put the check mark next to the option Send code via SMS attached to the screen Reset your password, Click the button Follow, Enter the code received via SMS in the corresponding field and press the button again Follow. Finally, write a New Password in the corresponding field, click the button Follow and indicates if disconnect from other devices log in with the old password or if stay connected. Finally, you just have to click on the button Follow To sign in to your account. Trusted Contacts Another great way to regain access to Facebook when you don't have your email, phone number, and password is to take advantage of the feature Trusted Contacts Facebook: in this way, it is possible to reset your password to the social network using the recovery codes provided by at least 3 trusted contacts, previously specified in the protection and access settings of the platform. How do you say? Did you really carry out this operation in anticipation of a similar eventuality? Perfect! To get started, connected to this Facebook page, indicate yours name and surname in the proposed field, click the button Search and then click on the button It is my account, corresponding to the profile you want to access again. Then click on the link Can't access it anymore? to indicate to Facebook that it is impossible to access the indicated mailbox, press the button I can't access my email and then complete the following fields indicating a new e-mail adress or phone number will be used to login later and press the button Follow. At this point, Facebook will advise you to ask your trusted contacts for help: first, click the button Show my trusted contacts and indicate, in the corresponding field, the name of three of your trusted friends to ask for help. Once done, contact the trusted friends you specified above, ask them to access the page to press the button Follow and to confirm that you are in contact by phone: you can do so by placing a check mark next to the article Yes, I spoke on the phone with (two nome) and by clicking on the button Follow. Each friend, at this stage, will show a secret code 4 digits: ask them to tell you the codes shown, write them down and digitize them in the fields Enter the code annex to section Ask your trusted contacts for help, then press the button Follow. To finish the recovery, enter a New Password in the corresponding field, click the button again Follow and confirm your identity by clicking verification link / numeric code received at the email address or mobile phone number indicated above. If you need more help on how to recover your Facebook account, I invite you to consult the guide on how to enter Facebook without email and password. Delete Facebook profile Were you able to regain access to the profile you intend to get rid of? Perfect, now you just have to follow the "classic" account deletion procedure to the letter. First, therefore, log into the social network using the data you just recovered, click on the ▼ button located at the top right and choose the item configurations of the proposed menu. At this point, click on the item Your information on Facebook resident in the left sidebar, click the link See combined with option Delete your account and information, Press the button Delete account and to start the removal procedure, type the password you used to access your profile and click the button again Delete account. Note that from this point on, you have 30 days of time to cancel profile deletion: if you intend to retrace your steps, you simply have to log in to Facebook with the credentials associated with the account within this period, after which your data will be deleted forever. Note - If you want to keep the information (posts, links, photos, videos, etc.) related to the profile you are about to delete, you can create a backup by pressing the button Download the information attached to the section Permanent account deletion.
